

StarForce FrontLine MMOG

FrontLine MMOG is a suite of professional tools for MMO game developers providing MMO game protection from various threats. The tools help secure game servers from unauthorized game launches, enable game code obfuscation and protection from hacking and modification, as well as provide game traffic security.

FrontLine MMOG features:

- Game code obfuscation and protection from hacking
- Protection against hooking of system functions
- Game traffic security between a MMOG server and a client computer
- Protection against game server substitution

FrontLine MMOG implementation pipeline:

Supported file formats:

- Standard Win 32/64 executable files
- Standard Win 32/64 dynamic link library (DLL) files
- .Net applications
- Data files if called by protected application files directly

* Encrypted and/or packed executable files are not supported.

Supported operating systems:

- Windows 2000
- Windows XP 32/64-bit editions
- Windows Vista 32/64-bit editions
- Windows Server 32/64-bit editions
- Windows 7 32/64-bit editions

FrontLine MMOG system requirements:

- Internet connection (broadband recommended)
